INTERNSHIP EXPERIENCE

Full Stack Web Development Intern – Pantech Solutions: *(Mar '24- Jun '24)*

- Built and deployed full-stack applications using Java, Spring Boot, Hibernate/JPA, REST APIs, React, HTML/CSS/JavaScript.
- Implemented JWT & Google OAuth security, managed MySQL and Supabase PostgreSQL, containerized with Docker, deployed on Google Cloud Platform's Cloud Run, hosted on Netlify, and used Git/GitHub following SDLC.

PROFESSIONAL SKILS

Languages: Core Java, Python, SQL (MySQL).
Backend Development: Spring Boot, Spring MVC, Spring Security (OAuth 2.0, JWT), Spring Data JPA, Hibernate ORM, REST API.
Frontend Development: React, HTML5, CSS3, JavaScript (ES6+), Responsive Design.
Cloud & Orchestration : Google Cloud Platform (Cloud Run, App Engine), AWS (EC2), Kubernetes, Docker, Microservices.
DevOps & Tools : Linux CLI, Shell Scripting, Git, GitHub, Copilot, DevOps (CI/CD), JIRA, Postman, Data Structures & Algorithms.
AI & ML: Machine Learning (Supervised & Unsupervised), NumPy, Pandas, Matplotlib, Basic Neural Networks.
Testing & Quality: Selenium WebDriver, Page Object Model (POM), Cucumber (BDD), JUnit 5.

PROJECTS

Smart Inventory Management System(SIMS) using Spring Boot : (Github Repo) *(Live Demo)*

- Developed a Spring Boot–based Smart Inventory Management System with secure login, centralized inventory, and modules for products, stores, sales, and purchases. Implemented REST APIs, CSV sales ingestion, low-stock alerts, and real-time analytics using supabase SQL (cloud database) with JPA/Hibernate.
- Containerized the application with Docker and orchestrated a CI/CD pipeline via Google Cloud Build for automated deployment to Cloud Run and hosted the frontend on Netlify.
- Managed infrastructure using Linux environments and integrated automated testing (Selenium, Cucumber, JUnit) into the pipeline to ensure reliable releases.

Tools & Technologies: Java 21, Spring Boot 3, Maven 3, Docker, MySQL 8, Supabase PostgreSQL (Cloud), Hibernate, RESTful API Architecture, Google Cloud Platform(Cloud Run for backend deployment), containerized with Docker, Netlify (frontend hosting), Git, GitHub, HTML/CSS/JavaScript, React 18, Maven 3, Selenium 4(WebDriver), POM, Cucumber Java 7, Junit 4.

Machine Learning–Driven Demand Forecasting for Smart Inventory: (Github Repo) *(Live Demo)*

- Developed a Machine Learning model to forecast product demand using historical sales data, applying feature engineering and trend-based analysis to improve prediction accuracy.
- Built and optimized models using Scikit-learn, leveraging data preprocessing, hyperparameter tuning, and evaluation metrics to ensure robust and reliable performance.
- Implemented an end-to-end ML pipeline with automated retraining and real-time inference, enabling data-driven inventory optimization and smarter stock management decisions.

Tools & Technologies: Python 3, Pandas, NumPy, Scikit-Learn, Machine Learning (Demand Forecasting), Data Preprocessing & Feature Engineering, Django REST Framework (RESTful APIs), React, HTML/CSS/JavaScript, MySQL, containerized with Docker, Git, GitHub, Model Training.

EDUCATION

B.Tech | Computer Science and Engineering (AI & ML) **CGPA: 7.34/10**
Vaageswari College of Engineering, affiliated to JNTUH *2021 - 2025*
Intermediate **CGPA: 9.52/10**
Sri Chaitanya Junior College(Telangana State Board of Intermediate Education) 2019-2021
SSC **CGPA: 9.8/10**
Siddartha High School(Board of Secondary Education(BSE), Telangana State) 2018-2019

CERTIFICATIONS

Coursera - IBM Full Stack Java Developer and Data Science
Forage - British Airways Data Science Job Simulation & Deloitte Data Analytics Job Simulation
