INTERNSHIP EXPERIENCE

Full Stack Web Development Intern – Pantech Solutions: *(Mar '24- Jun '24)*

- Built and deployed full-stack applications using Java, Spring Boot, Hibernate/JPA, REST APIs, React, HTML/CSS/JavaScript.
- Implemented JWT & Google OAuth security, managed MySQL and Supabase PostgreSQL, containerized with Docker, deployed on Google Cloud Platform's Cloud Run, hosted on Netlify, and used Git/GitHub following SDLC.

PROFESSIONAL SKILS

Languages: Java, C, SQL (MySQL).
Frameworks: Spring Boot, Spring Data JPA, Hibernate, React.js.
UI/UX & Web Design: HTML5, CSS3, JavaScript (ES6+), REST API.
Cloud & Orchestration : Google Cloud Platform (Cloud Run, App Engine), Kubernetes, Docker.
DevOps & Tools : Linux & Shell Scripting, Git, GitHub, Copilot, DevOps (CI/CD), JIRA, Postman.
AI & ML: Machine Learning (Supervised & Unsupervised).
Testing & Quality: Selenium WebDriver, Page Object Model (POM), Cucumber (BDD), JUnit 5.

PROJECTS

Smart Inventory Management System(SIMS) using Spring Boot : (Github Repo) *(Live Demo)*

- Built a Spring Boot–based Smart Inventory Management System with secure login, centralized inventory, and modules for products, stores, sales, and purchases implemented REST APIs, CSV sales ingestion, low-stock alerts, and real-time analytics using Supabase SQL with JPA/Hibernate.
- Containerized the app using Docker and set up a CI/CD pipeline with Google Cloud Build for deployment to Cloud Run; hosted frontend on Netlify and ensured reliability with automated testing (Selenium, Cucumber, JUnit) in Linux environments.

Tools & Technologies: Java 21, Spring Boot 3, Maven 3, Docker, MySQL 8, Supabase PostgreSQL (Cloud), Hibernate, RESTful API Architecture, Google Cloud Platform(Cloud Run for backend deployment), containerized with Docker, Netlify (frontend hosting), Git, GitHub, HTML/CSS/JavaScript, React 18, Maven 3, Selenium 4(WebDriver), POM, Cucumber Java 7, Junit 4.

Machine Learning–Driven Demand Forecasting for Smart Inventory: (Github Repo) *(Live Demo)*

- Developed and optimized a Machine Learning model for product demand forecasting using historical sales data, applying feature engineering, preprocessing, and hyperparameter tuning with Scikit-learn to improve prediction accuracy and ensure robust performance.
- Built an end-to-end ML pipeline with automated retraining and real-time inference, enabling data-driven inventory optimization and smarter stock management decisions.

Tools & Technologies: Python 3, Pandas, NumPy, Scikit-Learn, Machine Learning (Demand Forecasting), Data Preprocessing & Feature Engineering, Django REST Framework (RESTful APIs), React, HTML/CSS/JavaScript, MySQL, containerized with Docker, Git, GitHub.

EDUCATION

B.Tech | Computer Science and Engineering (AI & ML) **CGPA: 7.34/10**
Vaageswari College of Engineering, affiliated to JNTUH *2021 - 2025*
Intermediate **CGPA: 9.52/10**
Sri Chaitanya Junior College(Telangana State Board of Intermediate Education) 2019-2021
SSC **CGPA: 9.8/10**
Siddartha High School(Board of Secondary Education(BSE), Telangana State) 2018-2019

CERTIFICATIONS

Coursera - IBM Full Stack Java Developer and Data Science
Forage - British Airways Data Science Job Simulation & Deloitte Data Analytics Job Simulation

SOFT SKILLS & HOBBIES

Soft Skills: Problem-solving, coding, debugging, teamwork, and communication.
Hobbies: Reading, fitness, and staying updated with technology trends.
